

## Changes and corrections

Version 21.0.6

(21.0.6.7 - SOD-1565) Crash ved multiplacering fra komponentmenu, hvis symbol ikke fandtes

(21.0.6.7 - SOD-1544) Crash in cable plan module after closing the project

(21.0.6.5 - SOD-1560) Crash ved gem (Tegningshoved indeholder datafelt som peger på billede)

(21.0.6.5 - SOD-1561) Crash ved vælg komponent efter kopiering af side

(21.0.6.1 - SOD-1505) Label shows pictures if text is a part number.

(21.0.6.x - SOD-1552) In rare cases a warning dialog about accessory's main component was shown when a project was opened

(21.0.6.x - SOD-1522) Partslist: Accessory amount is not correctly counted, if there is a mix of components with artical number and some without.

(21.0.6.x - SOD-1523) Lists | Read components list did not work. Header was missing so picking components failed.
